

TWITCH-DJ v0.5.0

Installation & Streamer Guide

BEFORE YOU BEGIN

EQUIPMENT

Nexus Is Required

The software uses ProDJ Link which is a feature only found Nexus models.

Check Pioneer's website and look for ProDJ Link in the specifications.

If you don't see it, you don't have it.

DJM-900NXS2
DJM-900NXS

CDJ-2000NXS2
CDJ-2000NXS

CDJ-900NXS

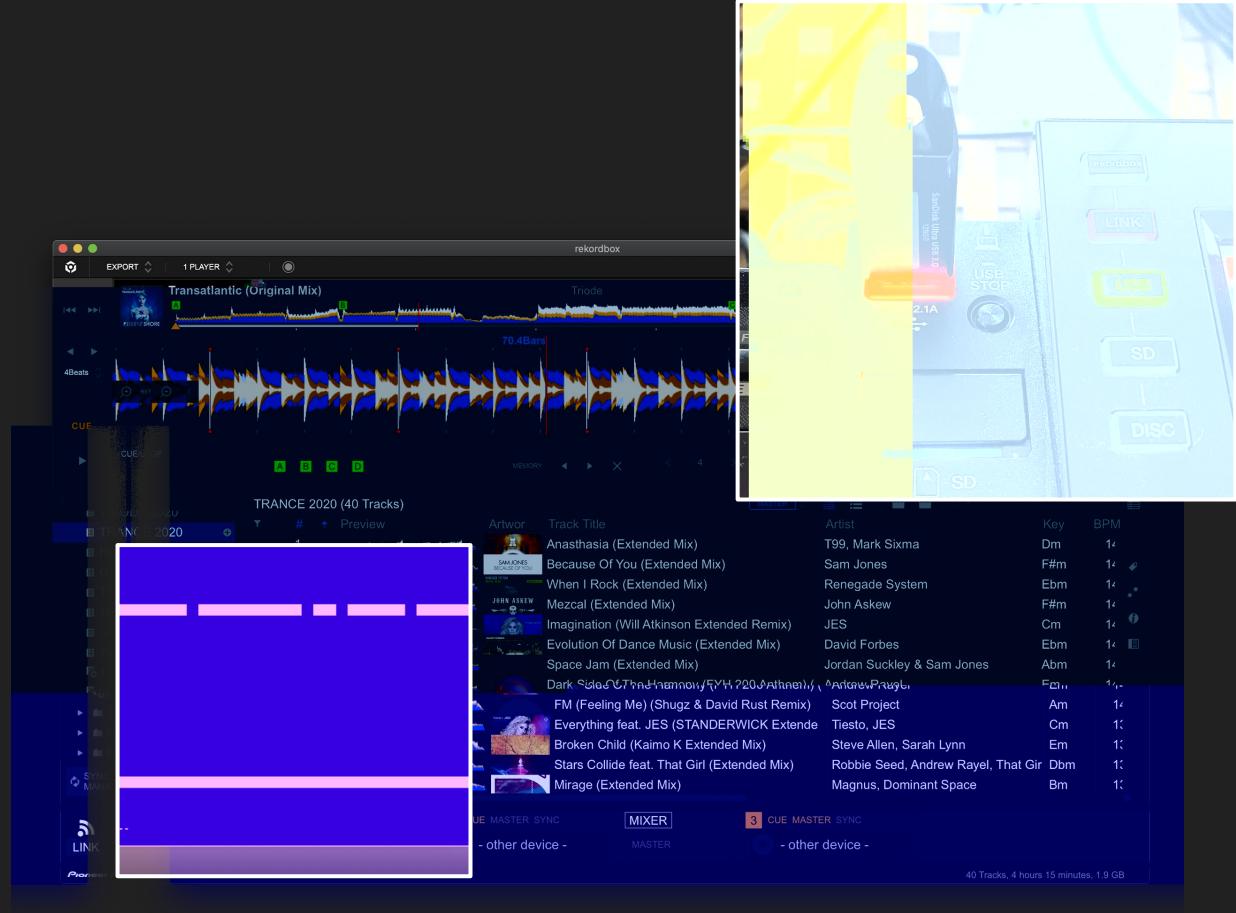

XDJ-XZ

EQUIPMENT

USB / Link Mode

USB sticks, SD cards, CDs, and RekordBox in LINK Export mode will work.

EQUIPMENT

Not Supported Yet

The Pioneer controllers without Nexus *won't work*.

Using Rekordbox in Performance mode *won't work*.

XDJ-RX

DDJ-1000

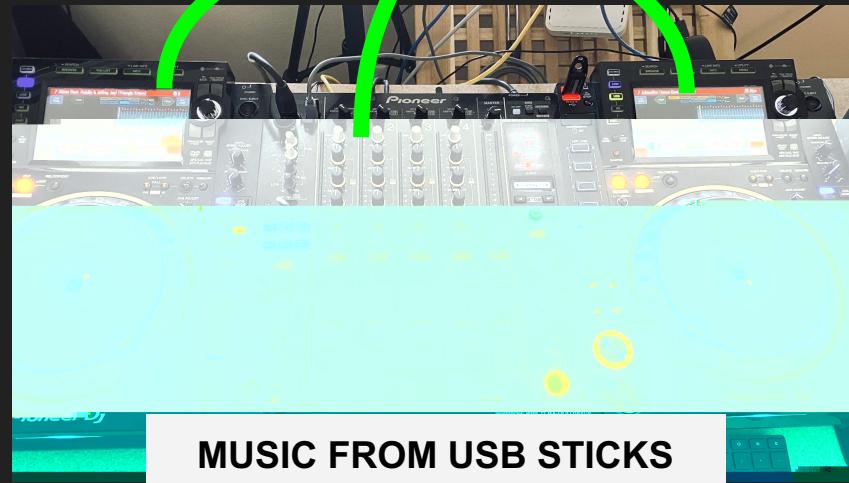

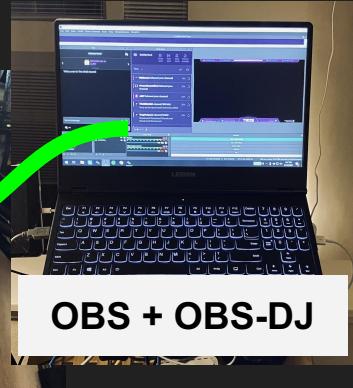

RekordBox Performance Mode

SETUP

If you use USB sticks

The required setup is 2 to 4 CDJ, mixer, and the laptop connected to the same ethernet hub.

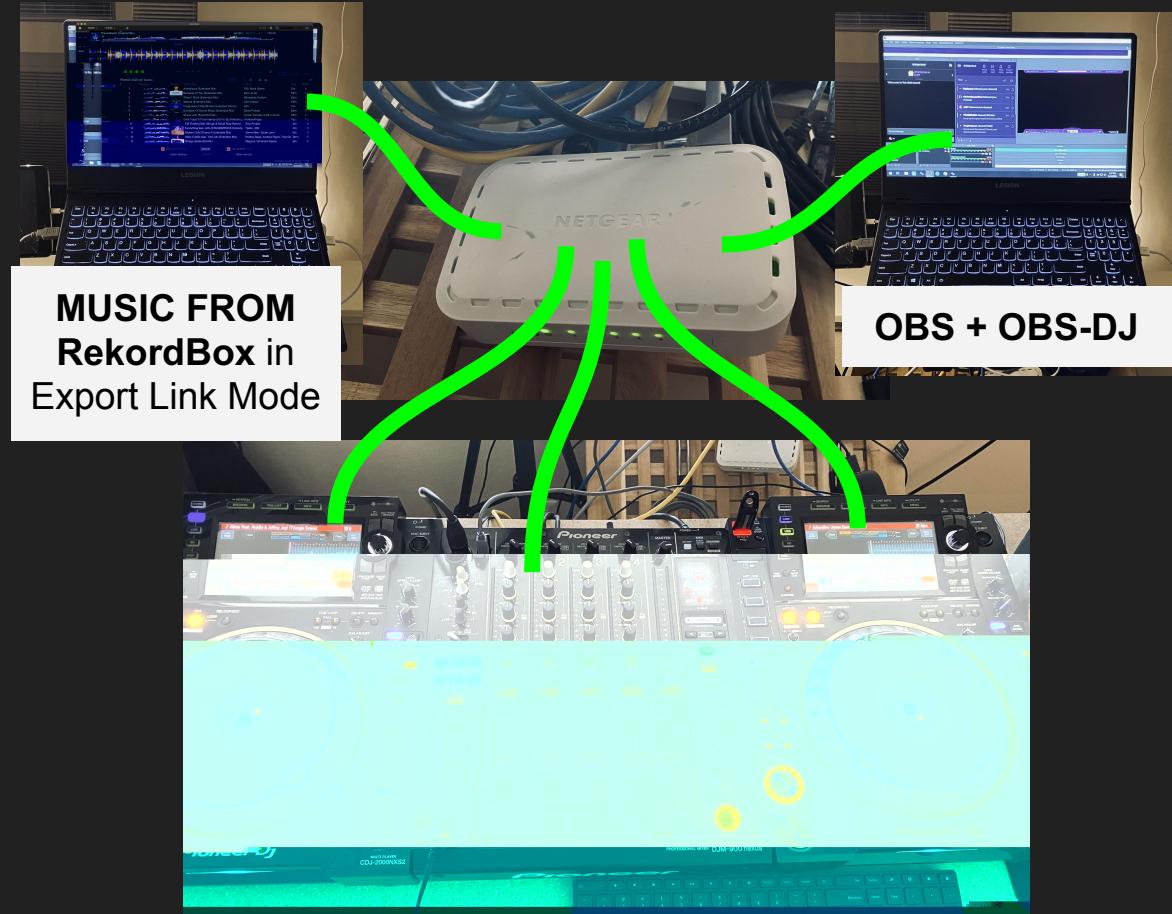

MUSIC FROM USB STICKS

SETUP

If you use Export Mode

If you use RekordBox in Export Link Mode, you must run RekordBox on a different computer.

OBS-DJ and RekordBox running simultaneously will conflict with each other.

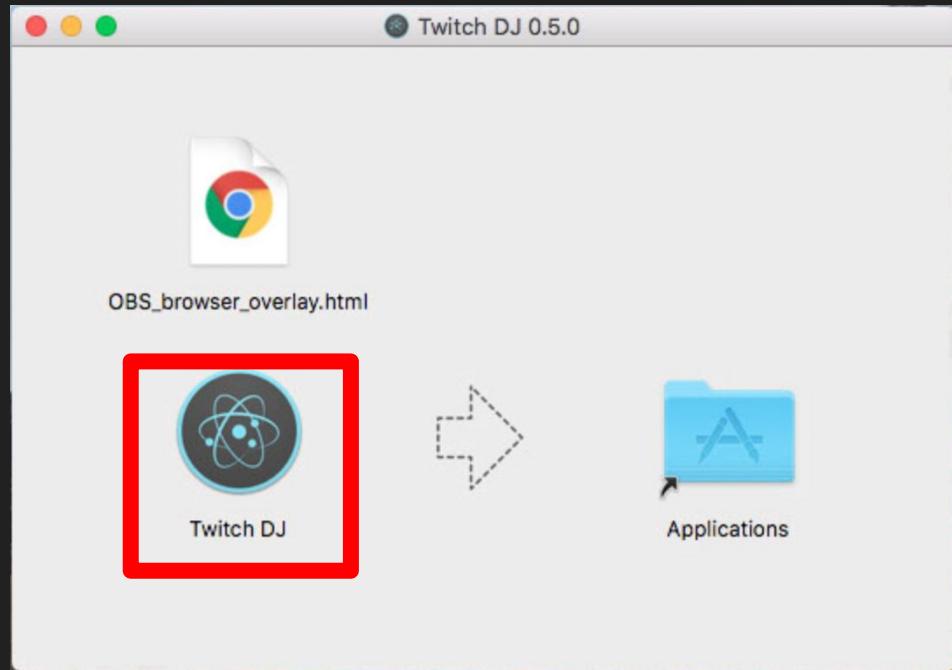

INSTALLING OBS-DJ

STEP 1

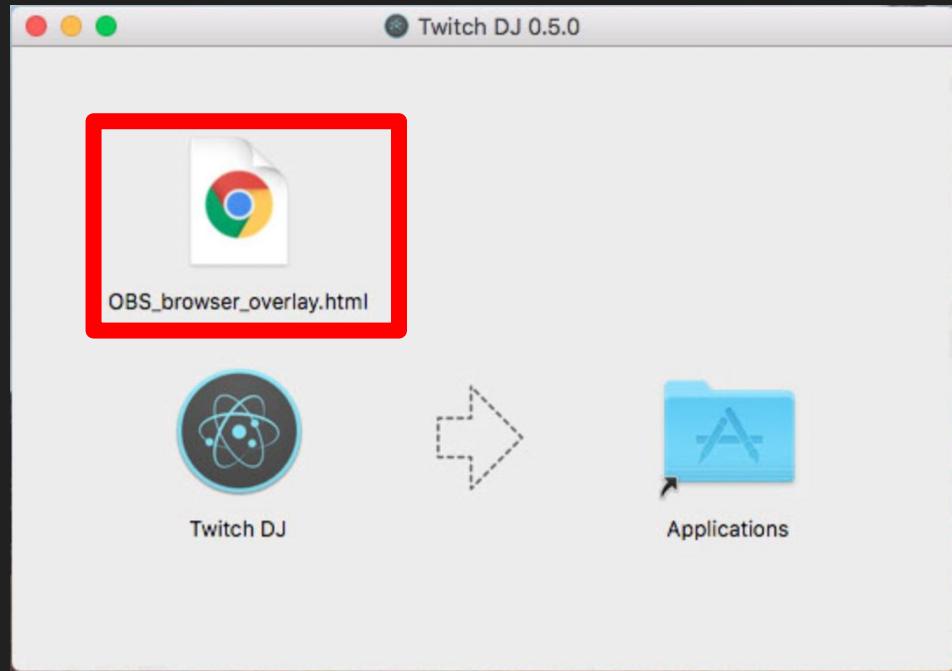

Drag the app into
your Applications
folder on Mac.

OBS-DJ is only for Mac right now.
Windows version coming soon.

STEP 2

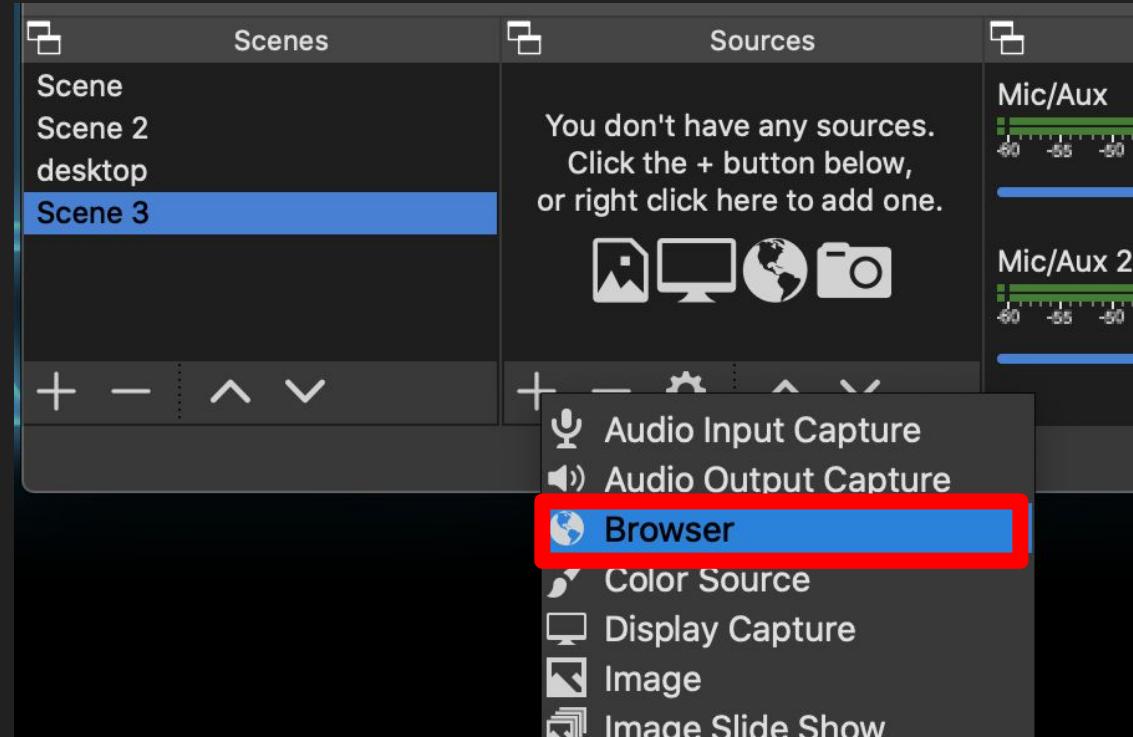

Drag the HTML to
your Documents
folder.

STEP 3

Add a browser source in OBS

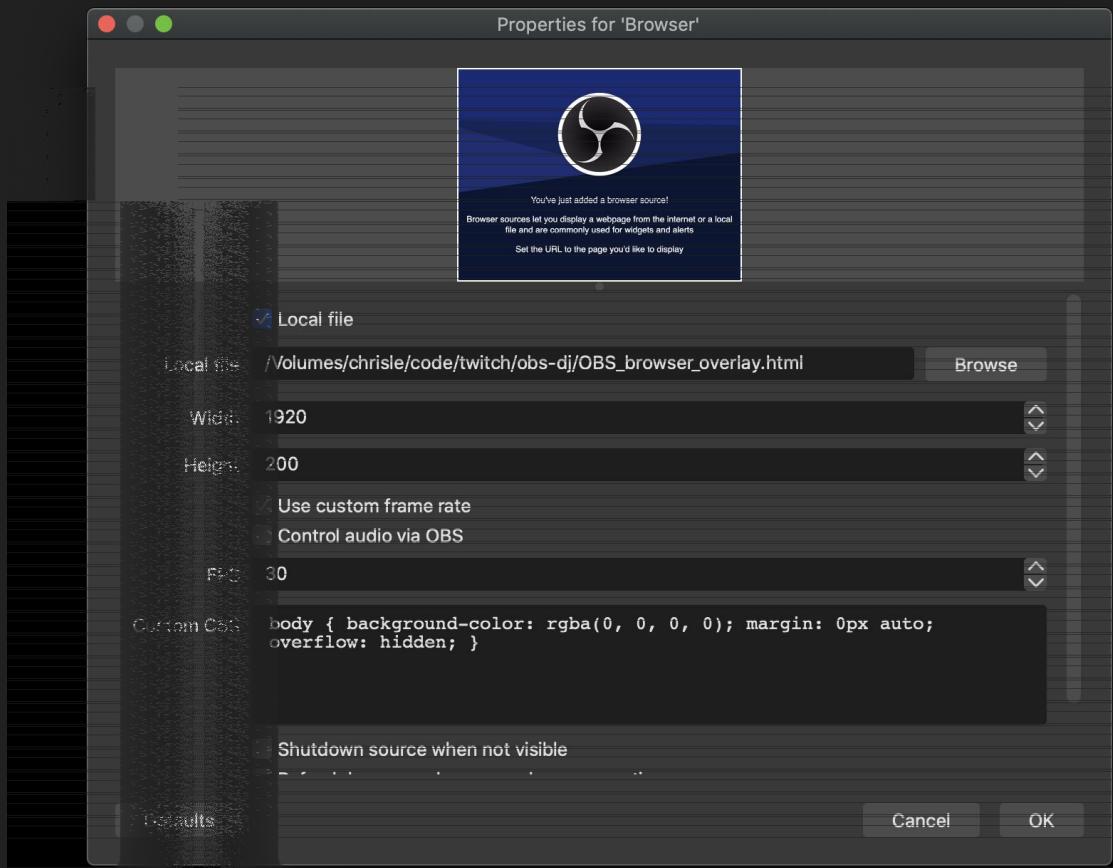

Create a new Browser source in OBS.

STEP 4

Use these settings

- Checkmark “Local file”
- Choose
“OBS_browser_overlay.html”
as the file
- Width: 1920
- Height: 200
- Leave everything else alone

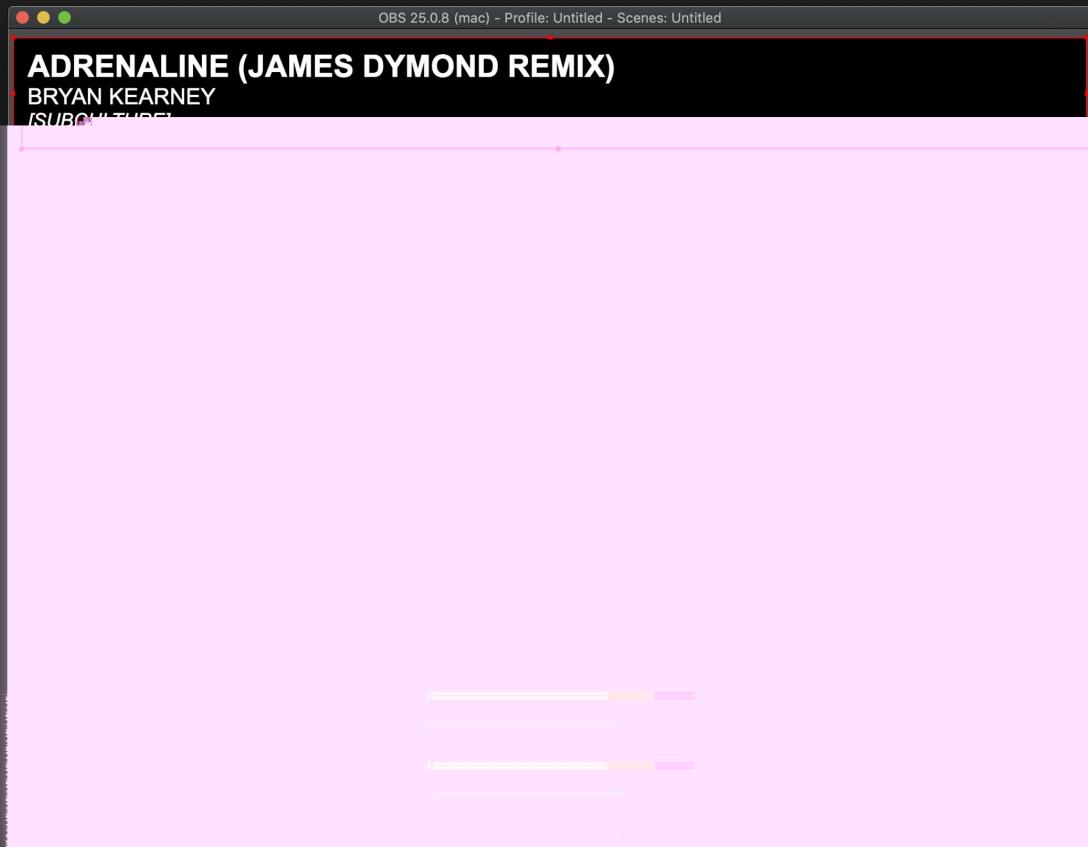

DONE

READY TO GO!

You can move the overlay around
or resize the box.

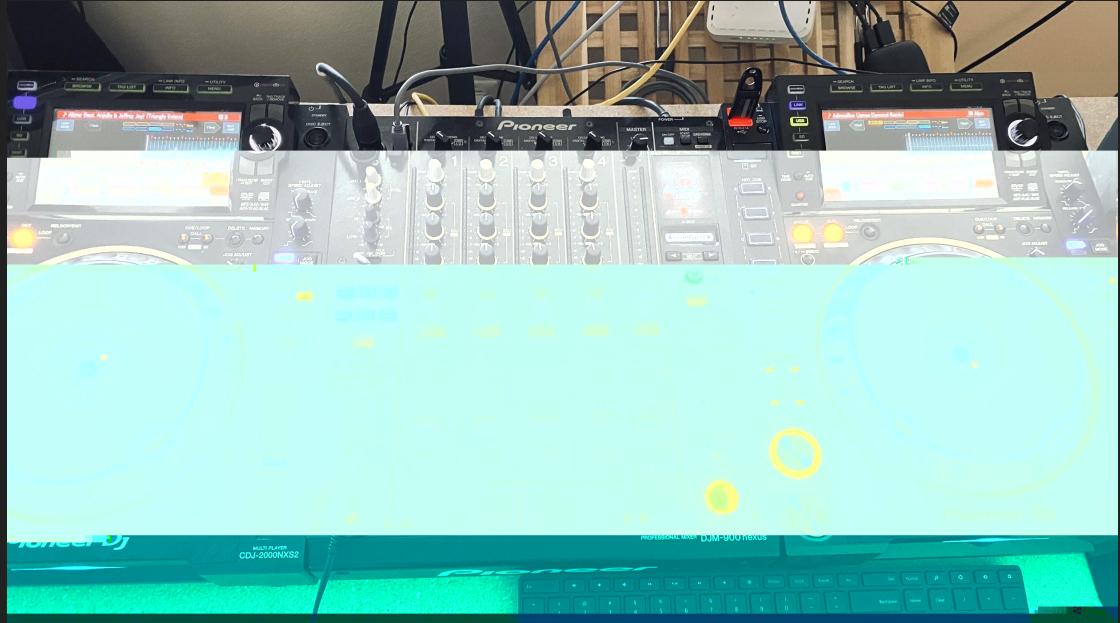

Later sections will show you how to
customize the fonts and colors.

STREAMING

STEP 1

Turn on your CDJs
and mixer *first*.

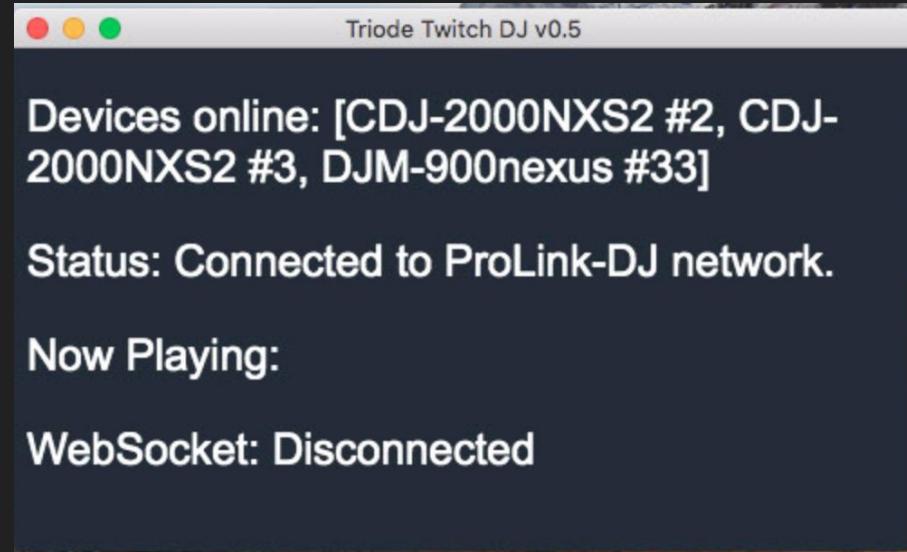

STEP 2

Open OBS-DJ

Your CDJs and mixer should appear as online and status should be “connected”.

If they’re not showing up, try turning on and off your CDJs and mixer.

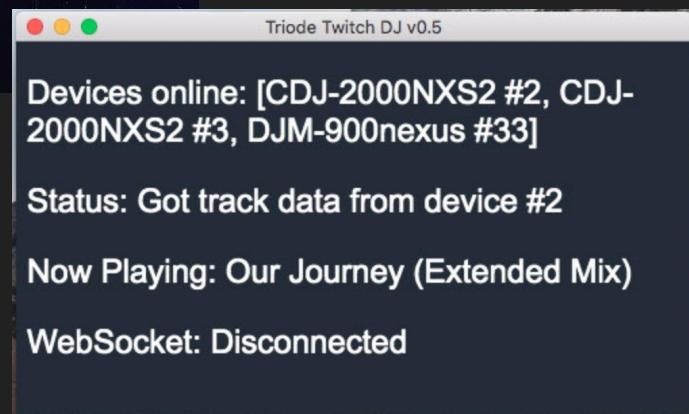

STEP 3

Load a track

Load a track onto one of your CDJs and press the “MASTER” button.

Now wait until status says “Got track data from device.”

Depending on how much music you have, this might take a 60-90 seconds.

READY

You're ready to
stream!

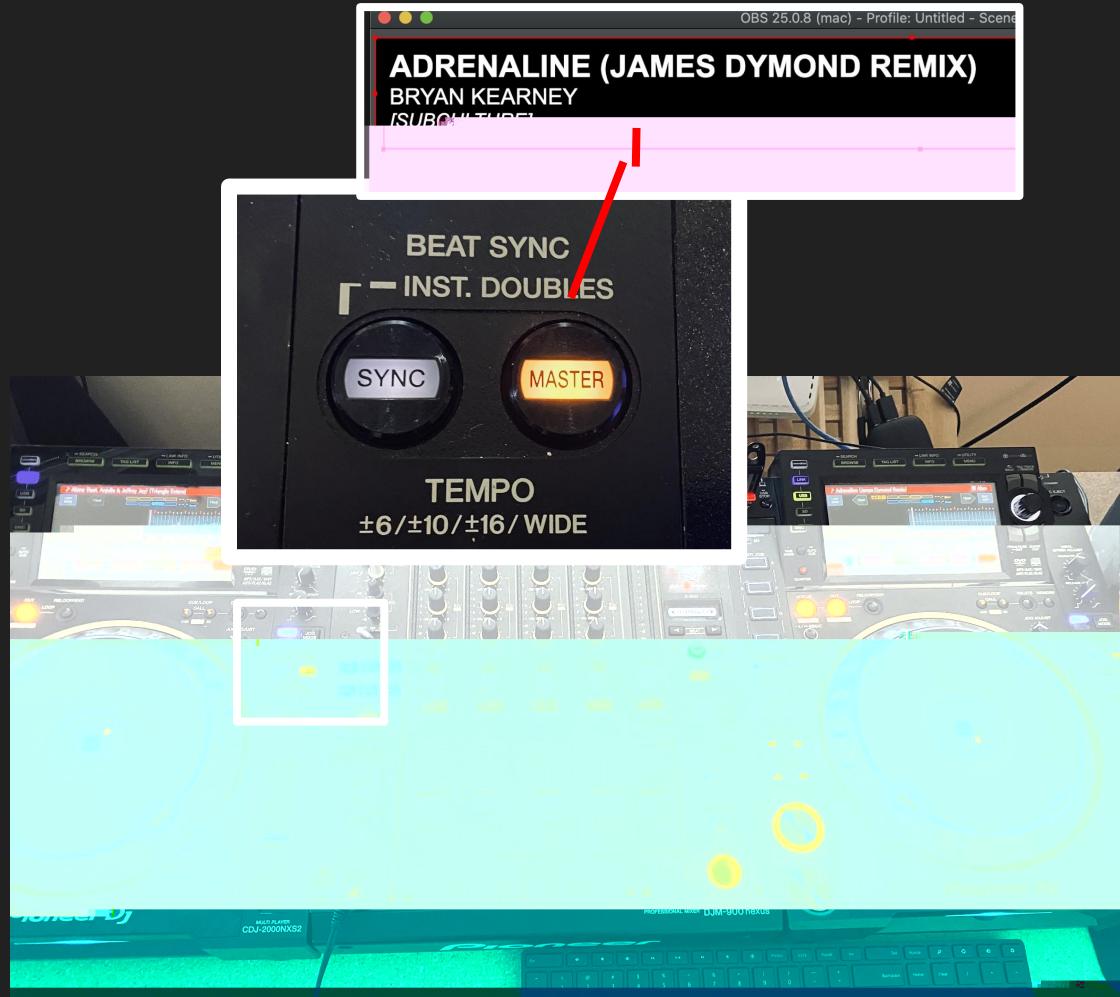

USING OBS-DJ

Automatic Title

OBS-DJ will show the whichever CDJ is master track. Just DJ normally and it will do the rest.

OBS-DJ detects which CDJ is the master and displays the song title for it.

USING OBS-DJ

Manually Changing Track IDs

Press the Master button on your CDJ to manually change the track that is displayed in your stream.

CUSTOMIZING

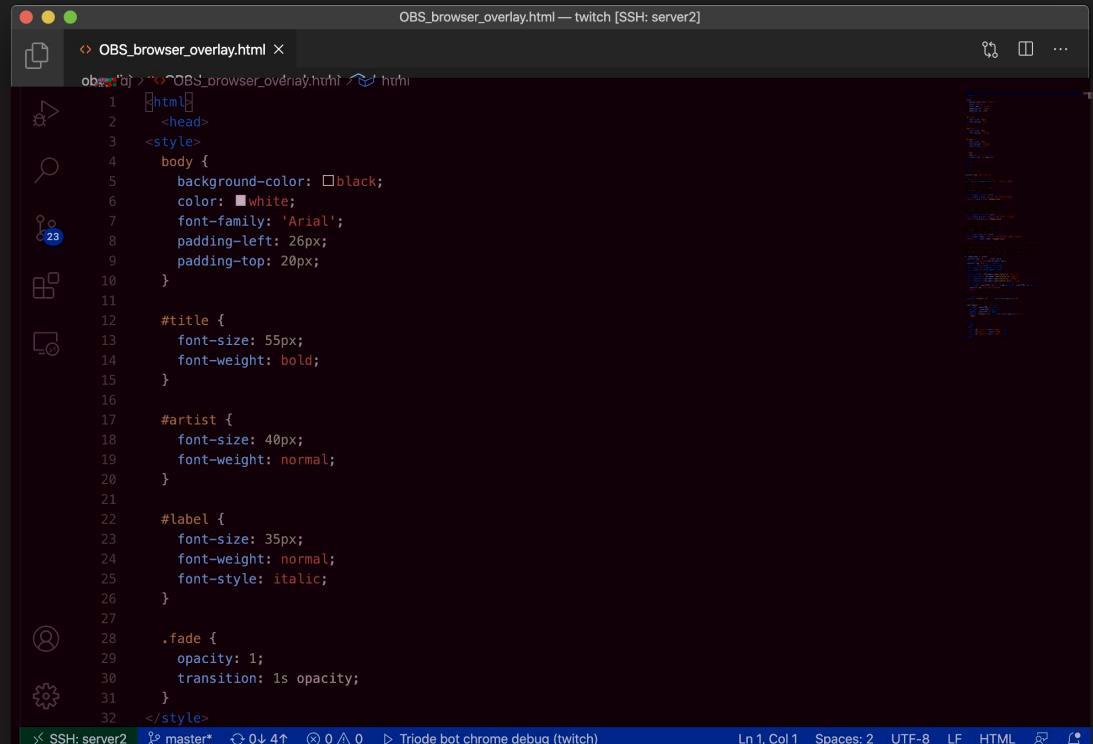

CUSTOM LOOK

Edit the HTML

Edit the `OBS_browser_overlay.html` file to change the font, size, color, and animation.

You can test it with your browser.

When you're done, reload the browser source in OBS.

```
obs@i: ~> cat OBS_browser_overlay.html > huihui
OBS_browser_overlay.html — twitch [SSH: server2]
obs@i: ~> cat OBS_browser_overlay.html > huihui
1  <html>
2    <head>
3      <style>
4        body {
5          background-color: black;
6          color: white;
7          font-family: 'Arial';
8          padding-left: 26px;
9          padding-top: 20px;
10         }
11
12       #title {
13         font-size: 55px;
14         font-weight: bold;
15       }
16
17       #artist {
18         font-size: 40px;
19         font-weight: normal;
20       }
21
22       #label {
23         font-size: 35px;
24         font-weight: normal;
25         font-style: italic;
26       }
27
28       .fade {
29         opacity: 1;
30         transition: 1s opacity;
31       }
32     </style>
```
